PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building secure, scalable web applications and REST APIs across government digital infrastructure, fintech platforms, marketplace products, and an independently shipped SaaS product. Currently building and maintaining production systems at NACTA HQ for the Government of Pakistan using React.js, Node.js, and Express.js. Built AudienceRelay, a live SaaS marketing operations platform with lead capture, social content planning, AI creative tools, developer REST API, and a four-tier billing system. Experienced in Agile environments, code quality, and security implementation.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, Java, HTML5, CSS3, XML, SQL
Frontend:	React.js, React Native, Redux/Redux Toolkit, Tailwind CSS, Responsive Design, WCAG, Component Architecture
Backend	Node.js, Express.js, REST API Design, JWT Authentication, OAuth 2.0, RBAC, Session Management, Input Validation
Databases:	MongoDB, Firebase Realtime Database, Firestore, Schema Design, Query Optimisation
Security & Mobile:	JWT, RBAC, 2FA, KYC Workflows, Webhooks, React Native (iOS/Android), Android (Java/XML), Performance Tuning
Tools & SaaS:	Postman, Git, GitHub, Docker, CI/CD, Vercel, Render, Cloudinary API, Multi-Tier Billing, Paystack, Figma, Jira

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern — Government of Pakistan (NACTA HQ) May 2025 – Present | Islamabad, Pakistan

- Build and maintain full stack web applications for internal government management systems using React.js, Node.js, and Express.js, supporting digital infrastructure for sensitive national security operations.
- Design and develop RESTful APIs supporting real-time data processing across multiple internal government modules, ensuring reliable data flow between interconnected system components.
- Implement role-based access control (RBAC) and secure JSON Web Token (JWT) authentication to protect sensitive government data using defence-in-depth security practices.
- Write clean, modular, and maintainable code following established architecture patterns to keep the codebase stable, testable, and auditable while iterating quickly.
- Collaborate closely with backend, database, and security teams to deliver features meeting strict government compliance standards, participating in code reviews and architecture decisions.

React Native Intern — CodeAlpha Aug 2024 – Sep 2024 | Remote

- Built and maintained cross-platform mobile app features using React Native, debugging UI/UX issues across iOS and Android.
- Collaborated with senior developers on production-grade mobile workflows, performance tweaks, and code reviews.

React Native Intern — DEN Pakistan May 2024 – Jul 2024 | Pakistan

- Contributed to cross-platform mobile application development, implementing features and resolving bugs across iOS and Android builds.
- Optimised mobile performance by resolving rendering and state management bottlenecks in React Native.
- Gained hands-on experience with navigation, component lifecycle management, and REST API integration in a live production setting.

CLIENT & PROJECT EXPERIENCE

AudienceRelay — Full SaaS Marketing Operations Platform

| Personal Project (audiencerelay.com)

- Built a complete SaaS marketing operations platform from scratch covering waitlists, contact forms, newsletter signups, and custom lead capture workflows with consent-aware audience management.
- Designed and built a social content planning workspace with post drafts, brief creation, multi-channel calendar, team approvals, and scheduling across Facebook, Instagram, LinkedIn, TikTok, and X.
- Integrated OpenAI image generation API for automated creative briefs and built a public developer REST API with token authentication, signed webhooks, and cursor-based pagination.
- Designed and shipped a four-tier billing system (Free, Starter \$49/mo, Growth \$99/mo, Agency \$249/mo) with Paystack checkout supporting Naira payments, multi-seat teams, and workspace isolation.

HelloBob — Crypto Fintech Platform

| Client Project (Node.js, Express, MongoDB)

- Contributed to backend development on a crypto fintech platform supporting wallet management, crypto deposits/withdrawals, asset swaps, transaction tracking, and payout workflows for 50+ digital assets.
- Developed and maintained RESTful APIs for authentication, wallet operations, transaction management, and administration following secure API design principles.
- Implemented secure financial workflows covering KYC verification, 2FA, transaction PIN management, device verification, and session management.

Hollyway Global — Nigeria Marketplace Platform

| Client Project (Node.js, Express, MongoDB)

- Contributed to backend development on a Nigeria-focused marketplace platform connecting buyers and sellers across vehicles, electronics, furniture, and business stock.
- Developed RESTful APIs for marketplace listings, buyer requests, escrow-based transaction flows (verification, payment, dispatch, inspection, payout), and user management.
- Built backend logic for buyer/seller matching and order processing; integrated external payment, logistics, and delivery APIs.

Tulip Tea — Mobile App UI/UX Design

| Client Project (Figma)

- Designed user-friendly mobile app interfaces for Haji Abdul Waheed Group of Industries, translating requirements into high-fidelity Figma prototypes and building a reusable component style guide.

DevBlog Hub & Invoice Management System —

| Personal & Client Projects

- DevBlog Hub: Developed a full stack MERN blogging platform with secure authentication, category filtering, and Lighthouse performance scores > 90.
- Quotation/Invoice System: Built a React application using an iframe print approach to solve CSS print pagination issues, integrated Google Auth and Cloudinary API.

EDUCATION

Bachelor of Science in Computer Science (CGPA: 3.3 / 4.0)

2022 – 2026

Pir Mehr Ali Shah Arid Agriculture University, Rawalpindi, Pakistan

Relevant Coursework: Data Structures & Algorithms, OOP, Database Systems, Operating Systems, Computer Networks, Software Engineering, Web Technologies.

CERTIFICATIONS

- MERN Stack Development — Practical full stack development with MongoDB, Express.js, React.js, and Node.js
- JavaScript Algorithms and Data Structures — freeCodeCamp (2022)
- Responsive Web Design — freeCodeCamp (2021)
