

SADIA SULTANA

Full Stack Developer | React & React Native Developer | MERN Stack Developer

Rawalpindi, Pakistan | +92 311 5401253 | ssdev902@gmail.com | [linkedin.com/in/sadia-sultana-11b04b2b6](https://www.linkedin.com/in/sadia-sultana-11b04b2b6) | github.com/codecraftress919

PROFESSIONAL SUMMARY

Recent Computer Science graduate with hands-on full-stack experience across React.js, React Native, Node.js, Express.js, and MongoDB. Currently building secure, scalable web applications and REST APIs for government digital systems at NACTA HQ, with additional experience in cross-platform mobile development and UI/UX design. Fast learner and effective collaborator, comfortable owning features across the full stack in agile, cross-functional teams.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, HTML5, CSS3, XML

Frontend: React.js, React Native, Redux, Responsive Design, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Google Auth

Databases: MongoDB, Firebase

Mobile Development: React Native (Cross-Platform), Android (Java/XML)

Tools, Deployment & Version Control: Git, GitHub, Agile/Scrum, Figma, Adobe XD, Docker, CI/CD Pipelines, Vercel, Render

APIs & Other: Cloudinary API, API Integration, Debugging, Problem Solving, Team Collaboration

EXPERIENCE

Full Stack Developer - Government of Pakistan (NACTA HQ)

May 2025 – Present

- Develop and maintain full-stack web applications for internal government management systems using React.js, Node.js, and Express.js.
- Build and optimize REST APIs to support real-time data processing across multiple internal modules.
- Implement role-based access control and secure authentication to protect sensitive government data, collaborating closely with backend, database, and security teams.

UI/UX Designer - Tulip Tea (Haji Abdul Waheed Group of Industries)

Jul 2025 – Sep 2025

- Designed user-friendly mobile app interfaces aligned with brand identity, translating stakeholder requirements into high-fidelity Figma prototypes.
- Partnered remotely with the development team to refine interaction flows and improve overall user experience.

React Native Intern - CodeAlpha

Aug 2024 – Sep 2024

- Built and maintained cross-platform mobile app features using React Native, following clean, maintainable architecture patterns.
- Debugged and resolved UI/UX issues across iOS and Android, improving component consistency and usability.

React Native Intern - DEN Pakistan

May 2024 – Jul 2024

- Contributed to cross-platform mobile application development, implementing new features and fixing reported bugs.
- Optimized app performance by resolving rendering and state-management bottlenecks, following Agile development workflows.

PROJECTS

Hellobob: Crypto Wallet & Fintech Platform - Client Work

Mar 2025 – Mar 2026

- Worked as a Node.js Developer on a crypto-fintech platform supporting wallet management, crypto deposits and withdrawals, asset swaps, transaction tracking, and crypto-to-Naira payouts.
- Developed RESTful APIs with Node.js and Express.js, worked with MongoDB for financial and user data, integrated external services, and implemented secure authentication, validation, and transaction workflows. Contributed to the backend development of a crypto wallet and fintech platform supporting 50+ digital assets, including deposits, withdrawals, swaps, and crypto-to-Naira cash-outs.
- Developed and maintained RESTful APIs using Node.js and Express.js for authentication, wallet operations, transactions, and account management.
- Worked on secure financial workflows involving KYC, 2FA, transaction PINs, device verification, and session management.
- Integrated backend services for crypto transactions, real-time transaction status, market data, and Nigerian bank payouts.
- Worked with database systems and implemented validation, error handling, and secure API communication for financial operations.
- Collaborated with frontend/mobile developers to integrate backend services and deliver reliable user-facing features.

Hollyway Global: Marketplace Platform - Client Work

Mar 2025 – Mar 2026

- Contributed to the backend development of a Nigeria-focused marketplace connecting buyers and sellers for vehicles, electronics, furniture, appliances, lifestyle products, and business stock.
- Developed and maintained RESTful APIs using Node.js and Express.js for marketplace listings, buyer requests, transactions, and user workflows.
- Implemented backend logic for buyer-seller matching, wanted-item requests, order processing, and transaction management.
- Worked on escrow-based transaction workflows, including verification, payment, dispatch, inspection, and seller payout stages.
- Integrated external payment, logistics, and delivery services to support local, nationwide, bulk, and cross-border transactions.
- Worked with MongoDB for managing users, listings, requests, transactions, and marketplace-related data.

DevBlog Hub: Developer Blogging Platform - Personal Project

2025

- Built a full-stack MERN blogging platform (React.js, Node.js, Express.js, MongoDB) enabling developers to create, publish, and share technical tutorials and project write-ups.
- Implemented secure user authentication plus search and category-based filtering, with a clean, responsive interface for reading and writing across devices.

Quotation & Invoice Management System: Solar/Electronics Retailing System - Client Project

2025

- Built a React-based quotation and invoice management application to streamline document creation for a solar/electronics retail business.
- Resolved CSS print-pagination and PDF generation issues using an iframe-based print approach, fixing footer placement and unit-field display bugs for reliable, print-ready output.
- Integrated Google Authentication and the Cloudinary API for secure login and profile media management in a responsive, modular UI.

EDUCATION

Bachelor of Science in Computer Science

2022 – 2026

Pir Mehr Ali Shah Arid Agriculture University, Rawalpindi | CGPA: 3.3/4.0
